ANNUAL REPORT

of the

MEDICAL OFFICER OF HEALTH

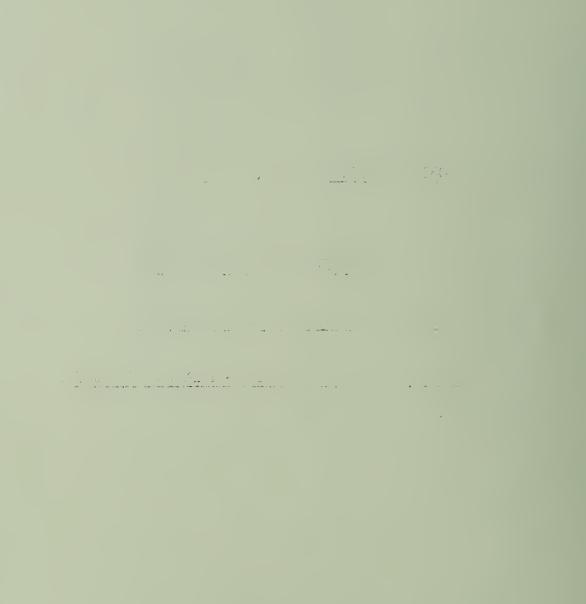

and

CHIEF PUBLIC HEALTH INSPECTOR.

IN RESPECT OF THE YEAR 1964

FOR THE RURAL DISTRICT OF SPILSBY

IN THE COUNTY OF LINCOLN - PARTS OF LINDSEY.

SPILSBY RURAL DISTRICT COUNCIL.

Public Health Staff.

Medical Officer of Health.

A. Loftus, L.R.C.P., L.R.C.S., D.P.H., Dip.Mid.

Chief Public Health Inspector.

W. Bailey, Cert. R.S.I., M.S.I.A., Cert. Meat and Other Foods.

Additional Public Health Inspector.

M.J. Whitehead, M.A.P.H.I., M.R.S.H., Cert. Meat Insp:

Clerk.

G.D. Holiday.

SPILS Y RURAL DISTRICT COUNCIL

Medical Officer's Report for the Year, 1965

Mr. Chairman and Gentlemen,

I have the hour to present the Annual Report on the Health and Sanitary conditions of the district for the Year, 1965.

The estimated mid-year population as supplied by the Registrar General was 22,480 compared with 22,270 in 1963., showing a growth in number of 210. There were 283 deaths from all causes giving a Death Rate of 12.5 per 1,000 population, slightly higher than the national rate of 11.3. There were 4 deaths in infants under 1 year of age. The greatest number of deaths occurred in persons over 65 years of age 78.37%. There were 320 births, 8 more than in the previous year. 17 births were illegitimate. The birth rate per 1,000 population was 14, lower than national rate of 18.4. There were 5 still-births.

Notifications were received in respect of 166 cases of Infectious Diseases, Measles accounting for 143, 11 Pneumonia, 4 Pulmonary Tuberculosis, 2 Non-Pulmonary Tuberculosis, 2 Scarlet Fever, 1 Dysentery, and 1 Puerperal Pyrexia.

Details of B.C.G. vaccinations carried out at Schools in Spilsby during the year under the County Council's School Children Scheme are as follows:-

	No.skin tested	No.found positive	No. found negative	No. vaccinated
School children under 14 years of age	109	6	103	103

HOME HELP SERVICE

Details regarding the Domestic Help Service in Spilsby during 1964 as follows:

Number of Helpers enrolled st the end of 1964: 38

Number	of cases	given help during 1964:-			
	Aged	Chronic sick	Moternity	Others	Total
	64	7	2	4	77
Number	of cases	receiving help at the end of	1964:		
	Aged	Chronic sick	Maternity	Others, -	Total
	53	4	Area	3	60

Sample of Food and Drugs taken for Analysis during the year.

Processed milk products Tinned, bottled and preserved foods Alcoholic beverages Non-alcoholic beverages Sugar and flour confectionemy Preserves Ment.and fish products Vinegars, spices and sauces Miscellaneous foods Cereals Drugs	582 4 2 4 2 7 4 3 3 2 3
Total	617

The numbers of samples of milk are substantial as all milk which is received at the two processing dairies situate at Spilsby and Willoughby is sampled at these places for convenience irrespective of the place of production.

Forty-six samples were deficient in fat or solids non-fat. All of the deficiencies were found to be due to natural causes and the producers have been advised accordingly and follow-up samples taken.

One sample of cherry pie filling was found to be inadequately labelled and representation has been made to the manufacturer as necessary.

The remainder of the samples satisfied the analytical tests.

The following samples of milk were subject to testing for efficiency of pasteurisation or sterilisation and for keeping quality. All of these samples satisfied the prescribed tests.

Tuberculin tested milk	
prsteurised	278
Pesteurised milk	214
Sterlised milk	109
Tuberculin tested milk, raw	13
Total	614

The foregoing samples included those from the two processing dairies together with samples taken on delivery rounds and milk shops. 164 samples of milk were taken for biological examination. These showed no evidence of tuberculosis but 8 were effected by brucella abortus. In all instances of milk from the affected herds is normally subject to pasteurisation apart from that may be consumed by the producers or their employees, who have been advised on the dangers of consuming the milk in its raw condition.

HOSPITAL SERVICES

GENERAL AND MATERNITY

Grace Swan Hospital provides for some medical, surgical and maternity cases. Other medical, surgical and maternity cases are admitted to Louth and Boston Hospitals. Paediatric cases are admitted to Boston, Louth and Lincoln Hospitals.

INFECTIOUS DISEASES

Patients suffering from these diseases are admitted to the Isolation Hospitals at Beston and Lincoln.

X-RAY FACILITIES

X-Ray facilities are provided by the Grace Swan, Spilsby Boston and Louth Hospitals.

WELFARE SERVICES

Under the provisions of the National Assistance Act, 1948., it is the responsibility of the Welfare Authority to provide accommodation for aged and infirm persons who are in need of care and attention. This accommodation is provided in the form of Hostels in the district. It was not necessary to take action under Section 47 of this Act during the year.

AMBULANCE SERVICE

Since the 1st January, 1964., there is a sub-station at Spilsby, this is staffed with 2 men and 1 ambulance.

THE CHILDRENS ACT, 1948.

By the provisions of this Act certain classes of children come under the care of the Childrens Department of the County Council. This department is responsible for children who are for various reasons deprived of normal care of their parents, and problem families. The Rural District as a Housing Authority can give a lot of help towards the re-housing of problem families, under this Act. There is one Residential Nursery in the district, situated at Burgh-le-Marsh.

GENERAL HEALTH SERVICES

MATERNITY SERVICE MIDWIFERY

Five Midwives serve the district, four full-time and one in a relieving capacity.

ANTE-NATAL and POST-NATAL.

Ante-Natal and Post-Natal work is undertaken by the general practitioners in the district.

INFANT WELFARE

An Infant Welfare Clinic is held at Friskney on the 2nd and 4 th Mondays of the Month, and at Wainfleet on the 1st and 3rd Wednesdays of the Month. Immunisation against Diphtheria, Whooping Cough, and vaccination against Smallpox and Poliomyelitis is done at these Clinics.

•

A Million Control (March 1994) and the Contro

WATI TR SUPPLY

The sources of supply for the Spilsby Rural district are:-(a) Three boreholes in the Spilsby Sandstone at Driby.

(b) Two boreholes at Mumby (l in Spilsby Sandstone and the other in the Chalk.)
(c) Outcrop Spilsby Sandstone Water at Twenty lands feeding a reservoir of 150,000 gallons capacity.

Water treatment

Bacillus Coli(Presumptive).

The water at Driby is aerated (to remove excess iron) filtered and chlorinated prior to pumping to a high level service reservoir at Scotland House on the main road from Spilsby to Ulceby Cross. The Mumby and Twentylands sources are chlorinated prior to passing to supply.

Samples have been taken regularly since the 1st April, 1964., when the Rural District Council Water Undertaking became an integral part of the East Lincolnshire Water Board.

The average daily and summer peak quantities of water supplied for all purposes are approximately 930,000 and 1,250,000 gallons respectively.

PUBLIC CLEANSING.

The acquisition of a suitable and convenient site in our coastal region for refuse disposal presents a real serious problem.

The present system of excavation, burning and covering with soil, is not ideal, but practicable under present circumstances.

From a survey of the coastal belt, the only suitable site for controlled tipping is an area between the two banks known as Chapel Marsh. It is an ideal site. If the site is obtained, refuse can be deposited in layers under the 'Bradford' tipping system, from bank to bank. The suggested area will ensure the Council has provision for the tipping of refuse for many years.

At present, the coastal area deals with refuse from licensed Camping Sites (involving over 7,000 caravans), along with 7 - 10 daily loads from Butlin's Holiday Camp, refuse from innumerable tents and domestic premises (approximately 1,600 bins); imposing a strain during the holiday season.

There is a refuse collection service in all sixty-nine parishes. Fifty-nine parishes receive refuse collection once every three weeks; three parishes once every two weeks and the remaining seven parishes once every week.

Refuse tips are situate at Spilsby, Ulceby, Stickney, New Bolingbroke, Burgh, Ingoldmells and Hogsthorpe.

Night Soil and Cesspaols.

There is a free cesspool emptying service at household premises once every two years throughout the District.

At Wainfleet St. Mary, Wainfleet All Saints, Ingoldmells and Burgh-le-Marsh, the vehicles attend properties with pail closets weekly; during the holiday season Ingoldmells receives a twice weekly collection.

The work done by the three cesspool vehicles covers:-

Private properties	1.008.
Schools	
Camp Sites	
Business Premises	
Sewage Disposal Works	
Public Conveniences	

The card index system appertaining to free cesspool service emptying at private houses totals 2,091.

CALPING SITES.

During the last few years, there has been a noticeable increase in the use of tents. No doubt many families consider this type of holiday delightful, free of restrictions and economic.

There is no reason why, in the near future, the owners of tent sites should not attain the high standard of amenities now provided on sites stationed with caravans.

There are 262 licensed camp sites, with a permitted number of 7,270 caravans, allowing many thousands of visitors to enjoy and benefit from the existing good conditions. Twelve unsatisfactory conditions respecting caravans were dealt with.

.

.

Spilsby, Hundleby and Halton Holegate.

Relative flow recorders fitted and daily chart readings completed. These are being forwarded to the Council's Consulting Engineers for submission of a report to the Ministry.

FOOD HYGIENE.

(a) Meat.

There are five licensed slaughter houses situate at Hogsthorpe, Stickney, Burgh, Halton Holegate and Eastville.

The Meat Inspection Regulations, 1963, created increased duties at the slaughter houses. Compulsory notification of regular hours of slaughtering of animals on fixed days was received from the butchers as follows:-

Eastville	One day per week.
Halton	
	Two days per week.
	Four days per week.

In addition, notifications are received respecting irregular days and hours of slaughter.

As a result of these Regulations, the time devoted to meat inspection affects other essential public health duties.

During the year 3,075 carcases and organs were inspected. The total weight of meat destroyed as diseased and unfit was :-

11 cwt 3 grs 3 lbs.

(b) Other Foods.

There were 942 inspections at various food premises. Twelve contraventions were observed and remedied.

Evening inspections are necessary at our coastal resort to check on the numerous open food stalls selling hot dogs, whelks, winkles, oysters etc.

HOUSING.

During the year, 23 Demolition Orders were made; 47 properties were demolished following Demolition Orders and 7 dwelling houses were subject to Closing Orders.

114 new houses were erected, 109 by private enterprise and 5 by Council.

Position at the 31st December, 1964.
